Mobile Application Development for Global Health Programs

VIRTUAL STUDENT FOREIGN SERVICE

VSFS

Project Title	Mobile Application Development for Global Health Programs
Project Summary	Development of a mobile application that U.S. government staff working overseas can use to take photos of beneficiaries and obtain digital permissions to use the photograph(s) taken of them as well information collected about their story.
Country	United States
Agency	Department of State
DoS Office	S/GAC
Post	N/A
Section	N/A
Number of Interns	2

Project Description

The Office of the U.S. Global AIDS Coordinator and Health Diplomacy (S/GAC) is seeking VSFS e-Interns to develop a photo & digital permissions application for use by U.S. Mission staff overseas. The app would allow beneficiaries to get written permission from the subjects of their photos for the U.S. government to use those photos and any information shared to demonstrate the personal impact of U.S. global health programs. Ideally the app will work on both iOS and Android OS. The e-Intern will have the opportunity to participate in all aspects of app development based on their interests and will be integral to helping the office's mission of sharing how health investments advance U.S. Foreign policy.
